

Supporting Your Health

Whether our Plan Members need help knowing what questions to ask their doctor, are dealing with a family or personal medical issue, or are looking for available health resources near where they live, HealthConnector™ is there to support them. By going online or calling their personal HealthConnector Information Specialist, they can connect with the support and information they need to navigate the Canadian healthcare system, and make more informed health decisions.

Balance and Understanding

An important part of being truly healthy is recognizing and understanding the non-medical factors that can impact daily life. LifeWorks® online allows Plan Members to browse articles and other resources that help them better cope with everyday issues ranging from work-life balance and parenting concerns, financial and legal issues to dealing with aging loved ones. They can also download relevant printed and recorded information and tools directly to their computer that can help them start to lead balanced, productive lives.

If you are an Equitable Life Plan Member please visit EquitableHealth.ca and have your Equitable Life Group Benefits wallet card handy to activate your account.

If you are an employer looking for more information regarding Equitable Life of Canada Group Insurance or EquitableHealth.ca, please speak to your Independent Group Benefits Advisor.
